The new Micro Tweezers

PA120-B

PA120-B Micro Tweezers

The JBC Micro tweezers are designed for soldering and desoldering SMD components easily, reducing handling time.

Shortest distance Tip-to-Grip

Provides the greatest manual control of the tool, including when using a microscope.

Stable movement

A single axis system helps guide your hand and steadies your pulse.

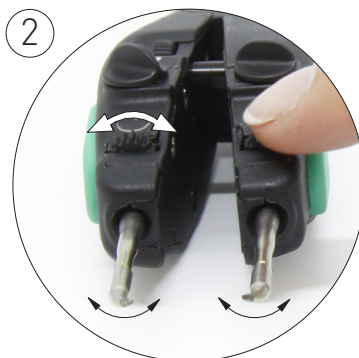

Finger grip

The concave shape means a snug fit for your finger which prevents it sliding down the handle.

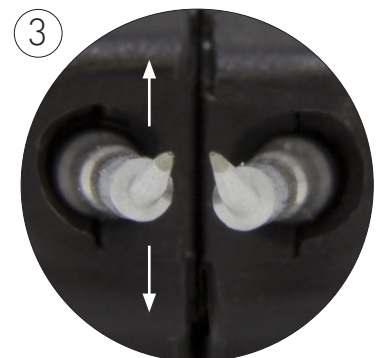

Complete alignment control over the cartridges (Features)

1
Locking
Manual fixing without any tool.

2
Rotational alignment
Turn the cartridges in any direction through the wheels.

3
Vertical alignment
The tail wheel guarantees that the cartridges are equally aligned.
